

Viking Subscriber Software 22.1.3 Maintenance Release

Release: January 13, 2023

FSN-0123-VIKING-26

This Field Software Notice (FSN) announces the KENWOOD Viking® subscriber software version 22.1 Point 3 Maintenance release. This release is an Armada update to improve management of system key rule changes made in the initial 22.1 release.

Software Versions

The following table capture the Viking Software items and corresponding versions included in this release.

Item	Version
Armada Client	1.36.23
Armada Server	1.36.23

This release of Armada reenables the system key rules in place before the 22.1 general release (1.34.x and before). To enable the newer, more relaxed rules (automatically in place in Armada 1.36.12 – 1.36.20), system owners must uncheck the 'Strict System Key Rules' checkbox. Strict rules are automatically enabled on initial upgrade or when system keys are assigned to a system. A valid soft key or master ESK is required to disable strict mode.

For questions regarding this Field Service Bulletin, please contact the KENWOOD Viking team at 1.800.328.3911, option 3.
