

Viking VK5000 Series Product Announcement

Effective Release: 04/24/17

FSN-0417-VK5000-02

EFJohnson is announcing the availability of the new [KENWOOD Viking® VK5000](#) keyloader. The KENWOOD VK5000 is a versatile and ruggedized keyloader that uploads encryption and authentication keys to KENWOOD Viking radios quickly and easily. It is available in a ruggedized case and connects to a KENWOOD Viking radio for configuration and key management. The Key-loader application facilitates secure encryption and authentication key generation, key storage and programming capability for land mobile radios.

KEY FEATURES

- Create, download, and erase multiple keys simultaneously
- P25 Unit Authentication support
- AES-128, AES-256 and DES encryption keys
- Multiple key databases for fleet management
- Compatible with ATLAS Key Management Facility (KMF) and JEM 2 Encryption cards
